Ergonomically designed to provide maximum support
PUshion has a specially moulded cushioned arch support and a cupped heel for heel support.

Remains spongy and last longer
PUshion has memory that resets its spongy property unlike normal EVA insole.

Anti-static provision
The antistatic thread sewn into the PUshion insole provides conductivity to preserve the anti-static property of the anti-static footwear.

Massages your heel
PUshion has specially designed "massage studs" to reduce fatigue on heel.

Superior shock absorption properties
PUshion significantly reduces stress of impact on the heel and the forefoot as compared to normal EVA insole.

Keeps your feet fresher all day long
PUshion is lined with breathable and moisture transmitting top lining that contains anti-microbial additives which reduces foot odor.

KillFIRE Dry Chemical (ABC Powder) Fire Extinguishers

Portable stored pressurized fire extinguishers are manufactured to SS 232, and approved by Singapore Civil Defence and Standards, Productivity and Innovation for Growth. Killfire fire extinguishers are manufactured in strict conformance to BS 5423: 1987. SS232/80.

KILLFIRE range of dry chemical fire extinguishers contain the best grade of ABC powder which deals with electrical hazards, flammable liquids, vehicle fires and gasses. Creating physical interception of the heat; cooling effects by aqueous vapor and carbonating action in the combustion zone. When these powders are applied to hot and smoldering surfaces, the particles fuse and swell to form a barrier which excludes oxygen and thereby completes the extinguishing process and prevents re-ignition.
