## Green Compound

The green bar is commonly used in the final step to extremely fine colour buffing on all types of metals when a brilliant mirror finish with no blemishes is required.

SKU	Description
010001301	Polishing Compound Green

## White Compound

Excellent and effective compound for a final finish on stainless steel and chrome plated parts. Perfect results also achieved on a wide range of non-ferriferous metals. Can be rely upon to remove the fine marks from pre-polishing.

SKU	Description
010001302	Polishing Compound White

# Abrasive

## Brown Compound

SKU	Description
010001303	Polishing Compound Brown

## Black Compound

The black bar is the most aggressive cutting down compound and is commonly used in combination with sisal buff for heavy cut down operations on ferrous metals, such as stainless steel and iron. Depending on the required application, black bar can be modified for different cutting aggressiveness.

SKU	Description
010001304	Polishing Compound Black
