SPECIAL FOR CHEMICALS **OILS - LUBRICANTS - GASOLINE SOLVENTS - DETERGENTS**
SCALE-REMOVERS - GLYCOLS, DETERGENTS, ACIDS, HIDRAULIC OILS

Range of products apt to spray oils, lubricants, solvents, detergents, scale removers, concrete casting oils. DI MARTINO manufactures the "Alta Tech" Line with **FPM** and **EPDM** gaskets. By these two types of gasket it is possible to spray most existing fluids provided that they do not damage plastic parts of the pumps. Concentrations and mixtures of chemical elements used are also highly important. It is therefore always necessary to test the product involved. Due to variability of the concentration and chemical composition of these liquids, it is necessary to carry out a practical test to verify the specific compatibility with the sprayer and read the technical card of the product before use. It is prohibited to spray explosive, corrosive and inflammable liquids.
